Other projects

The *lukeslanguagelearning* link contains an *Unreal* Project made with C++ and Unreal's blueprints with over 10,000 words of agile test-driven project managed documentation. Other 2D and 3D videogame projects such as Unity3D and Universal Windows Platform (UWP) applications were created using OOP in C# also available linked via my foxyflow GitHub.

Information about myself

I enjoy the whole creation process of designing something from programming. EG a game, application, or website. Problem solving is very satisfying especially when it can lead to better life improvements. I have created several websites and games over time.

Within the workforce, I have come from an applied Education and Construction background. Now that I have completed my Bachelor of Science major in Applied Computing -- a three year heavily focused programming degree in a variety of languages: including but not limited to: C# and .NET using MVC models; JavaScript using JSON APIs, NodeJs, and ReactJs; Python and Bash; and PHP with Apache's WAMP (finished in July 2021), **I would like to be programming for a living in a team environment.**

Additional information

- Spare time activities: chess, guitar, and lately running to Italian music.
- Have spent time in: Australia, Cook Islands, USA, UK, Italy, and China.
- Hold a current passport, full car, and learner bike licence.
