Seeking

Intermediate web development or software engineering position. – Programming work in New Zealand or Australia. Happy to move or work remotely for an ideal job: game development using JavaScript or something close such as Frontend ReactJS or game development in another language.

2023: Currently focusing on JavaScript and using libraries such as KaboomJS (for 2D games) and three.js. for 3D websites.

Skills from Educational Experience

Within my foxyflow Github, each skill has a language-labelled coded project to see how I code <https://github.com/foxyflow>

Strong Experience:

Object-oriented programming (OOP)

- C# and .NET
- JavaScript and React
- Python
- Solidity (Blockchain)

Software:

- Unreal Engine
- Unity Software
- IDEs: Visual Studio 2019 (and PyCharm)
- Apache: WAMP
- Adobe Suite software

3 Years' Educational Experience:

Other languages:

- Linux Bash
- API creation
- PHP
- SQL
- C++

Software:

- Maya and Photoshop (3D and 2D modelling)
- Trello (Kanban and Scrum)
- Java Software (Weka (Machine Learning))
- Postman (Backend testing)
- Ubuntu on Windows (Bash)

Games: The *lukeslanguagelearning* link contains an *Unreal* Project made with C++ and Unreal's blueprints with over 10,000 words of agile test-driven project managed documentation. Other 2D and 3D videogame projects such as Unity3D and Universal Windows Platform (UWP) applications were created using OOP in C# .NET also available linked via my foxyflow GitHub.

Information about myself

I have created a series of programming videos to teach core concepts such as Object Orientated Programming (OOP) – this is taught using Python for future proofing applications because of its vast versatility in the marketplace ... videos on YouTube.

<https://www.youtube.com/channel/UC9IZmtiofWELTH9zk8GHxHQ>

After graduating I got a paid internship as a blockchain developer. Within the remote role I created a website using the Solidity language for the backend with NodeJS and NextJS with JavaScript and ReactJS as the frontend. The website can convert your artwork into an NFT using the ERC721 standard smart-contract and connecting to a web3 platform such as Metamask. I problem-solved how to create, list, and sell NFTs for people – this was a solo

project as the others in the team were not technical in this respect. As the contract has ended, I can now display my work: <https://github.com/foxyflow/BlockchainWork>

I enjoy the whole creation process of designing something from programming. That is, a game, application, or website. Problem solving is very satisfying especially when it can lead to better life improvements. I have created several websites and applications over the years.

Within the workforce, I have come from an applied Education and Construction background. Although I enjoy it, I then completed a Bachelor of Science major in Applied Computing -- a three year heavily focused programming degree in a variety of languages to set myself up for the future and keep up with more relevant present conditions.
