### Seeking

Junior software development or software engineering position. – Programming work in New Zealand or Australia; other countries would have to provide a work-visa.

### Skills from Educational Experience

Within my foxyflow Github, each skill has a language-labelled coded project to see how I code <https://github.com/foxyflow>

#### Strong Educational Experience:

Object-oriented programming (OOP)

- C#
- C++
- Python

#### Software:

- Unreal Engine
- Unity Software
- IDEs: Visual Studio 2019 (and PyCharm)
- Apache: WAMP

#### 3 Years' Educational Experience:

- Linux Bash
- JavaScript and ReactJS' hooks
- API creation using NodeJS
- PHP

#### Software:

- Maya and Photoshop (3D and 2D modelling)
- Trello (Kanban and Scrum)
- Java Software (Weka (Machine Learning)
- Postman (Backend testing)
- Ubuntu on Windows (Bash)

*Software, languages, libraries, and frameworks are all tools to help produce a better product and service – I will happily adapt to what your workplace is using.*

### Portfolio

**My business website:**

<https://lukeslanguagelearning.academy>

**How I present: A series of lesson plans teaching programming:**

**How I wrote a business plan:**

**Other projects**

<https://github.com/foxyflow>

The *lukeslanguagelearning* link contains an *Unreal* Project made with C++ and Unreal's blueprints with over 10,000 words of agile test-driven project managed documentation. Other 2D and 3D videogame projects such as Unity3D and Universal Windows Platform (UWP) applications were created using OOP in C# also available linked via my foxyflow GitHub.

## **Information about myself**

Currently, creating a series of programming videos to teach core concepts such as Object Orientated Programming (OOP) – this is taught using Python for future proofing applications via its vast versatility in the marketplace ... plus my interest in TensorFlow.

I enjoy the whole creation process of designing something from programming. EG a game, application, or website. Problem solving is very satisfying especially when it can lead to better life improvements. I have created several websites and applications over time.

Within the workforce, I have come from an applied Education and Construction background. Now that I have completed my Bachelor of Science major in Applied Computing -- a three year heavily focused programming degree in a variety of languages: including but not limited to: C# and .NET using MVC models; JavaScript using JSON APIs, NodeJs, and ReactJs; Python and Bash; and PHP with Apache's WAMP (finished in July 2021), **I would like to be programming for a living in a team environment.**

### **Additional information**

- Spare time activities: chess, guitar, and lately running to Italian music.
- Holidays in: Australia, Cook Islands, USA, UK, Italy, and China.
- Hold a current passport, full car, and learner bike licence.

## Work experience
